## **FAA Approves Shadin Fuel Flow Meter on Robinson R66 Turbine Helicopters**

**Torrance, CA** — Robinson Helicopter Company is now offering Shadin Avionics' fuel flow meter on new R66s equipped with Garmin GTN 6xx or 750 GPS navigators. The fuel flow meter provides real-time fuel flow data to the GTN which in turn displays the fuel consumption rate along with fuel range rings on a moving map. Fuel used, fuel remaining, fuel to destination, and other real-time information is also available on accessory pages.

The installation adds approximately 2 lbs to the aircraft's empty weight and lists for \$6,800.

Founded in 1973, Robinson Helicopter Company is the world's leading manufacturer of civil helicopters. For more information, visit <https://robinsonheli.com>.
